FIRE CHIEF B. A. BONSER REPORTS:

The year 1983 was one of continued progress toward completing long term programs started in previous years. Long term planning has been extremely important to propel the fire services into the computer era and to permit the most efficient staffing of task force projects.

The reorganization of the Communications Division and the development of a modern radio and computerized communication system was embarked upon in 1979. The infinite detail in the planning, development and installation of the new system by our staff is deserving of the highest praise. Working extremely well, Phase I daily demonstrates its efficiency and flexibility.

In November 1983, Phase II of this highly technologically advanced communication system, was initiated with the contract being awarded for the Computer Assisted Dispatch System to I.P. Sharp Associates Ltd., of Toronto. The projected time schedule anticipates the installation in November '84, and the system to be operational by the Spring of 1985.

Statistics for 1983 show that Medical Responses under our Basic Life Support Program have increased 54.6% over the previous year. Fires attributed to Arson were down by 32.4%, but the 277 fires still caused by this crime, are far too high. Arson accounted for $1,700,000. of the fire loss, or 26% of the City's total fire damage. Fortunately, fire deaths in the City were reduced to 9 for the year, in comparison to 19 in the previous year. Only 6 of the fire deaths were attributed to fires that occurred in buildings.

The career opportunities provided by a modern Fire Department and higher unemployment, resulted in 3,700 applications being submitted for our fire fighting recruitment program. During the final stage of selection, a series of medical, fitness and agility testing procedures are performed along with an interview to determine an applicant's qualifications and suitability to commence a career in the fire service.

On June 27th, a recruit class of 36 was added to the Department. Following the traditional six week initial training program at the Fire Academy, a completely structured, on-the-job training program continued in three designated Fire Stations until the completion of the six-month Probationary Period. The program is culminated with a one week review at the Fire Academy and a final assessment by the Fire Chief to ascertain if the probationary recruit fire fighter is qualified for Permanent Service employment.

Senior staff promotions during the year included: John McCall and Kenneth Jones to Platoon Chiefs, George Murray to Director of Communications, Remmit Gaade to Director of Planning and Research and Donald Marks to Director of Hose and Equipment Repair. We congratulate these new Officers on their personal career achievement, and extend our best wishes and support in their new roles, with the many challenges they will encounter in fulfulling their mandate.

continued

On a community service level, Toronto Fire Fighters embarked on a new and important public service project, by supporting and raising money for the Wellesley Hospital Burn Centre which becomes operational in 1984, and will serve most areas of Southern Ontario.

Toronto Fire Fighters spearheaded the campaign, and along with other area Fire Fighters, held a thrill show on October 8th at the Canadian National Exhibition Grandstand. In spite of inclement weather, the show was a success and included antique and modern fire apparatus from all over Southern Ontario which fascinated the audience. The show will be repeated in 1984.

Gradual changes have developed in Fire Apparatus Specifications. The switching from custom to commercially interchangeable fire vehicle engines and parts has eliminated long and expensive waits for replacements. New trucks were commissioned for 14 Pump, 17 Pump and Air Supply One.

Some of the year's more interesting seminars included:

> An Officers' Development Course highlighting the importance of labour management relations and leadership skills. Special guest speakers also covered Arson Awareness, Hazardous Material Incidents and Airport Emergencies.
>
> St. John's Ambulance have helped to co-ordinate a new certifiable First Aid Program to provide a superior service in medical assistance.
>
> A new program of annual re-certification for the use of self-contained breathing apparatus and the individuals ability to cope with possible equipment malfunction has been implemented.

We had the pleasure of hosting part of the reciprocal visit by a Delegation from the People's Republic of China in October. Having had the opportunity to head a Canadian Delegation in 1982 to their country, this was our opportunity to display and share our experience and technology in fire prevention and protection matters.

The good will demonstrated on both sides in helping to combat a common life threatening hazard in this scientific and technical exchange mission, promoted better understanding between our two countries. We were also successful in establishing valuable contacts for future trade prospects with Canadian industries.

I wish to acknowledge and express my appreciation to the Members of City Council, the City Services Committee, Department Heads and City Staff for the co-operation and support they have given us. This support combined with the encouragement received from community ratepayer groups, the business community, the media and associates such as Box 12, has made our work a rewarding and pleasant one.

In conclusion, I would be remiss if special commendation was not given to the personnel of the Toronto Fire Department who have displayed compassion and dedication in providing an efficient emergency service to the community.

DIVISIONAL STAFF

FIRE CHIEF BERNARD A. BONSER

Deputy Fire Chief Walter J. Shanahan

Assistant Deputy Fire Chiefs

William T. Sproule — Joseph F. Underwood

Platoon Chiefs	4	District Chiefs	36
